## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 09-08-03 has been considered.

### ***Allowable Subject Matter***

2. Claims 1-24 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest an apparatus and a method for determining a write current for a magnetic memory cell. In particular, the apparatus comprises: a write current generator for generating a write current to the magnetic memory cell; at least one test magnetic memory cell being magnetically coupled to the write current; wherein a switching response of the at least one test magnetic memory cell determines a magnitude of the write current generated by the write current generator.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Okano (JP 2003115577A) and Lammers (U.S. Patent 6,594,191) disclose circuits and methods for generating write currents in magnetic random access memories.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
